

For Immediate Release

CommLab India Partners With e-Learning for Kids

October 30th 2009 (Hyderabad, India and Ardmore, PA, USA) [CommLab India](#), a veteran in developing custom e-Learning courses has recently tied up with [e-Learning for Kids](#), the global non-profit foundation to develop e-Learning courses on various subjects for kids across the world. It will also translate and localize existing courses into a host of other languages to reach more kids. All these services will, of course, be offered free of cost.

RK Prasad and Ayesha, the top team at CommLab India met Dr. Nick van Dam, Founder and Chairman of e-Learning for kids in Hyderabad to discuss various ways how CommLab can support and contribute to the wonderful work that Dr. van Dam has started. It was a very fruitful meeting of like-minded professionals who want to contribute to one of the most disadvantaged sections of our society – kids. For pictures, please view <http://www.flickr.com/photos/commlabindia/>

Some areas for immediate collaboration were, of course, e-Learning courseware development, translation & localization of courses in English and re-branding CommLab's existing courses for e-Learning for Kids. CommLab also volunteered to promote the foundation among the schools and teachers, especially in Hyderabad.

Work has already started in right earnest in re-branding existing courses.

About e-Learning for Kids

Established in 2004, e-Learning for kids is a global nonprofit foundation dedicated to fun and free learning on the Internet for children between the ages 5 - 12, with courses in math, science, reading, health and computers. A volunteer staff consists of education and e-Learning experts and business professionals from around the world committed to making a difference.
